1 Abstract

An organized and systematic office solution is essential for all colleges, universities and organizations. There are many departments of administration for the maintenance of college information and student databases in any institution. All these departments provide various records regarding students. Most of these track records need to maintain information about the students. This information could be the general details like student name, address, performance, attendance etc or specific information related to departments like collection of data. College Data Management System also gives a straightforward interface to support of understudy data, staff information,attendance,fee record. It may be utilized by instructive establishments or schools to keep up the records of understudies without any problem. The creation and the executives of exact, modern data with respect to an understudies' scholastic profession is fundamentally significant in the college just as universities.This project basically aims to enhance efficiency and at the same time maintain information accurateness.Later in this paper features and improvement that allow achievement to this goal will be demonstrated and highlighted.
